

# Medical Oncology Drop Off

## MedVet Dayton

When you arrive with your pet for their Oncology drop off appointment, please enter the lobby and let the client service representative know that you are here, so the team can meet you to discuss your pet's history, diagnostic plan, treatment plan, and admit your pet to the hospital.

If you prefer to remain in your car, please park in a parking spot, and call us at 937.293.2714. We will review your pet's history over the phone as well as the diagnostic and treatment plan for the day. A technician will then come outside to retrieve your pet.

**Dogs:** Please leave your dog on your leash. We will exchange leashes and lead your dog into the hospital.  
**Cats:** Please leave your cat in their carrier. We will take their carrier into the hospital.

At this point, you can leave MedVet if you would like, and the doctor will call you with an update after your pet's evaluation to discuss results, recommendations, and to set up a discharge time. When you arrive to pick up your pet, please let the front desk know if you have any questions that you would like to discuss with a doctor, and you will be directed to an available exam room.
